

# Petar Komordžić

SOFTWARE ENGINEER

Novi Sad, Serbia | [petarkomordzic.com](https://petarkomordzic.com) | [petar.komordzic@gmail.com](mailto:petar.komordzic@gmail.com)

## Summary

---

Full-stack engineer with a proven track record of building AI-powered products from zero to production. Passionate about using automation to solve real business problems and move fast in startup environments. Committed to continuous learning and tackling new engineering challenges head-on.

## Experience

---

### FortixTech DOO (ZenithChat) | Software Engineer

July 2023 – Aug 2025

- Built and led multiple startup projects from the ground up — taking them from blank canvas to fully functional, production-ready products.
- Leveraged the latest AI technologies to streamline business operations, cut down repetitive tasks, and deliver real, measurable impact.
- Delivered tailored web solutions for clients in diverse industries, aligning with unique technical and business requirements.

### Vega IT | Software Engineer Intern

Sept 2022 – Sept 2022

- Developed full-stack .NET + React web application
- Learned about best-practices in software development and clean architecture
- Worked in an agile environment
